DETAILED ACTION

Statement of Reasons for Allowance

1.

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the cited prior art because the prior art does not teach, disclose nor make obvious the claimed method of making a novel solid activated aluminum-zirconium composition which is more effective and less irritating by the addition of a small amount of AlCl_3 and/or HCl to the activated aluminum component. This process accelerates the depolymerization of the activated ACH solution, and upon the addition of zirconium glycinate, the solution is further depolymerized and results in the formation of less polymerized zirconium species.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of

Reasons for Allowance."

2.
